2.3.1 – Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

Vijaya Institute of Technology utilizes student-centric teaching methods like experiential learning, participative learning, and problem-solving to enhance the learning experience. These methods include lectures, assignments, tutorials, practical sessions, projects, seminars, internships, and industrial visits, supported by facilities like the internet, LCD projectors, and multimedia tools.

Experiential Learning emphasizes interactive lectures, hardware/software lab sessions, and internships. Students work on mini and main projects, gaining hands-on experience and critical thinking skills. Participation in national and international competitions and industrial visits provides additional real-world exposure.

Participative Learning fosters teamwork through NSS activities like tree plantations, health awareness camps, road safety campaigns, and self-defense programs, such as karate training.

Problem-Solving Methodologies encourage students to complete assignments and projects, which enhance their cognitive skills and problem-solving abilities. Research activities, guided by faculty, lead to numerous publications by students and faculty.

ICT tools such as Learning Management Systems (Canvas, Google Classroom), video conferencing (Microsoft Teams, Google Meet), and online assessments (Google Docs, Kahoot) support effective teaching. The digital library, equipped with platforms like DELNET and SWAYAM, further enriches the learning experience. The Wi-Fi-enabled campus allows seamless access to online resources.
