### **Background**

According to a recent study published by the Hindustan Times (May 2018), India has about 253 million young people. Is India giving the right opportunities to its future generations, especially its vast young female population? The answer is a resounding no, as statistics show that India has a very poor work participation rate where female labor comprises only 27% of the labor force compared to 79% for males, proving that India is still lagging behind the G20 countries in work participation. Through Project Oorja, VOICE seeks to empower young women with knowledge and skills to help them realize their potential, become future ready, and transform into changemakers and leaders of tomorrow!

### **Objective of MOU - Project Oorja**

Project Oorja is a vehicle to empower women to overcome systemic inequalities. Considering these young women are poised to enter professional spaces as well as mark personal milestones, Project Oorja provides them with critical information about their health, safety, rights, future planning, and self-awareness. Furthermore, it equips these women to be future-ready, enabling them to take charge of their careers and lives, thus emerging as role models and change makers within their own communities. The project aims to empower 250 young women by imparting critical knowledge, skills required for the future, thereby making them job ready in the market.
